RE: Coronavirus (COVID-19) Supply Chain Risk

Dear Customer,

K-One Fluid Power wish to inform all our customers on the current condition of our supply chain for the products we represent and support throughout Australia.

At present all our core product lines have no change to production lead times. This is primarily due to very little/if any raw materials or components being procured from outside the origin country.

Below is a list of product categories with their country of origin -

Category	Origin
KAWASAKI Staffa Radial Piston Motors	England
KAWASAKI Axial Piston Pumps	England & Japan
KAWASAKI Mobile Pumps & Motors	England & Japan
KAWASAKI Mobile Parts	Japan
KAWASAKI Industrial & Other	Japan
TDZ Vane Pumps & Motors	Spain
AMCA Proportional Valves	The Netherlands
ARGO HYTOS Filtration	Germany
WESSEL HYDRAULIK Mobile Valves	Germany

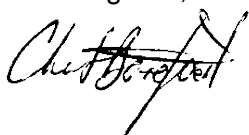

Each manufacturer will continue risk mitigation by identifying and reducing supply chain risks. To further reduce potential of outbreaks within facilities have enforced travel bans, restricted visitor access to site and continue to issue hygiene guidance whilst maintaining deep cleans.

K-One have also consulted our freight forwarders and received confirmation that only 1-2 day delays are being felt on air transit. Our sea freight ports and transit routes are operating as normal.

We will continue to monitor the situation and promptly advise any changes.

Should you have any further questions please contact us.

Kind regards,
